IMPACT REPORT 2025

WWW.KAREENROBBINSOT.COM

From Kareen...

2025 has been a year of growth, success, and regrouping for Kareen Robbins & Associates, LLC!

As I reflect on 2025, I am proud of the success in providing OTs, teachers, and families with knowledge and empowerment to support children. I have refined my direction by focusing on my expertise in sensory integration and school-based services. I served this population for the majority of my career. Sensory integration (Ayres SI®) principles and theory have been embedded into my assessments and interventions for the last 35+ years.

Acknowledging my own strengths (and needs) allows me to provide high-quality, evidence-based tools, professional development, and mentoring services to the OT profession and beyond with assurance.

Highlights of 2025 include a new, refreshed website, more independent and live courses, a larger toolbox of practical tools to support pediatric occupational therapists, increased mentoring services, and more social media presence.

Two new learning opportunities were developed in 2025, with 3 maybe even 4 more coming in 2026!

I am humbled and grateful for all those who entrust me with their learning, growth, and increasing their confidence in supporting children to succeed in their learning and growing!
